THIS REPORT IS TOP SECRET

Consolidated report on information obtained from the following PW:

CS/2297	Uffz ERDMANN	(A)
CS/2299	O/Gefr GRÜBLER	(B)
CS/2298	Uffz HEMPEL	(C)
CS/2300	Uffz KARRENBERG	(D)
CS/2296	Uffz SCHMITZ	(E)
CS/2295	Uffz SUSCHOWK	(F)

PW A of Gen der Nachr Aufkl, Gruppe IV, Ref 3a, captured at BAD REICHENHALL, 4 May 45

PW B, C, E, F of Gen der Nachr Aufkl, Gruppe VI, Ref 1c, captured at ROSENHEIM, 3 May 45

PW D of Gen der Nachr Aufkl, Gruppe VI, Ref 1b, captured at ROSENHEIM, 3 May 45

G E N E R A L D E R N A C H R I C H T E N A U F K L Ä R U N G

(A R M Y I N T E R C E P T S E R V I C E)

PREAMBLE

1. PW A is a Protestant pastor of German nationality, born in BESSARABIA, who went to GERMANY in 1930 and settled near DRESDEN. After an interpreter's course in Russian in 1941 he joined a German Naval Staff which was to undertake the occupation of LENINGRAD. In Mar 42 he was transferred to OKW/Chi and with a party from that dept proceeded to Horchleitstelle (Ost) LÖTZEN in Apr 42, to work as a cryptographer. He does not appear to have been very successful in crypto-analytical work; after specialising on NKVD traffic he took over the NKVD card index which was kept by Horchleitstelle (Ost) and later by Gen der Nachr Aufkl, Gruppe IV, Ref 3a.
PW is cooperative and has a reasonably good memory.

2. PW B is an electrician from BRESLAU. He served as an intercept operator with FNAST 7 at MINSK in 1942 and in Jan 43 was transferred to Horchleitstelle (Ost). He was released from the Army for a short time to work as a technician with Firma LORENZ, and then rejoined Gen der Nachr Aufkl, Gruppe VI, Ref 1c, where he was employed as a mechanic, supervising special intercept equipment.
PW is cooperative, but has only a limited field of knowledge.

HW 40/166

3. PW C is the nephew of Freda HEMPEL, the New York opera singer, and before the war worked as a technician for Firma LORENZ. Since 1943 he has been employed as a technician looking after special intercept equipment, originally with Horchleitstelle (Ost), latterly with Gen der Nachr Aufkl Gruppe VI, Ref 1c.
PW is cooperative, technically very able and generally well-informed on intercept matters.

4. PW D was born in POLTAVA, RUSSIA, in 1911; he is the son of a German manufacturer. He was educated in the USSR and settled in GERMANY in 1930. After studying music at the Conservatoire in BERLIN he became a piano teacher. He was called up in 1941 and, having fluent Russian, was employed as a signals interpreter with forward intercept units until 1942. From 1942 until Aug 44 he was senior Russian instructor in 2nd Coy of Nachr Dolmetscher Ers u Ausb Abt. In autumn 44 he took a cryptographic course in JÜTERBOG and then joined Gen der Nachr Aufkl Gruppe IV, Ref 3. Here he was employed as a cryptographer on enciphered Baudot traffic and was attached to Gruppe VI, Ref 1b
PW is somewhat vain but nevertheless exceedingly brilliant. He has a phenomenal memory and his statements are quite reliable.

5. PW E is a student from DÜSSELDORF. In 1941/42 he was employed as an intercept operator with forward "Y" units. In Dec 42 he joined the Horchleitstelle (Ost) LÖTZEN and was absorbed into Gen der Nachr Aufkl, Gruppe IV, Ref 1c as an intercept operator for Baudot traffic.
PW is intelligent and is well informed on intercept matters.

6. PW F was a student in BERLIN before the war. From 1941 he served as an intercept operator with forward "Y" units. He joined the Horchleitstelle (Ost) LÖTZEN in 1941 and has specialised as an intercept operator in Soviet inter-state traffic and in Baudot traffic. He was last employed in Gen der Nachr Aufkl, Gruppe VI, Ref 1c.
PW is very cooperative and exceedingly well informed on Russian signals procedure.

HISTORICAL SURVEY

ORGANISATION OF GERMAN ARMY INTERCEPT SERVICE UP TO OCT 44

7. The following were the main agencies responsible for Signals Intelligence in the German Army:

Forward "Y" units (Kdr d Nachr Aufkl), who were administratively and operationally subordinated to the Chief Sigs Officer of the local formation in the field, but who passed their material back to the higher echelons for further treatment.

Leitstelle d Nachr Aufkl (West). This unit was located at ZOSSEN and acted as the final evalutation centre for all Western European traffic. PW are not informed on the organisation of this unit, which has, however, already been dealt with in SIR 1303.

Horchleitstelle (Ost), located until Oct 44 in LÖTZEN, which acted as the central evaluation agency for Eastern front traffic and also for special tactical reasons undertook the cryptographic work necessary for that sector. See paras 8 et seq.

ORGANISATION OF GERMAN ARMY INTERCEPT SERVICE UP TO OCT 44 (contd)

7. (contd)

OKH In 7/VI, latterly known as Ag N/Nachr Aufkl, which, though in the Reserve Army, acted as the central cryptographic agency for the Army in respect of all traffic other than Russian. PW have no special knowledge on this subject, which has already been covered in SIR 1335 and 1704.

HISTORY AND ORGANISATION OF HORCHLEIT-STELLE (OST)

8. General

In view of the reorganisation and rationalisation of the German Army Intercept Service which took place in Oct 44 and of the establishment of a centralised control under Gen d Nachr Aufkl, it is considered appropriate at this stage to discuss the organisation of Horchleitstelle (Ost) before that date in order to understand the changes that occurred.

Historical

9. Horchleitstelle (Ost) originally assembled in BERLIN in summer 41, moved to LÖTZEN as Gruppe VI of OKH/Chef HNW (Chief Sigs Officer of the Army).
The Comd of this unit was Obstlt i G KETTLER, latterly Obst KETTLER and head of OKW/Chi; his successor in 1942 was Obst Baron von der OSTEN-SACKEN, who committed suicide after 20 Jul 44.

10. In summer 42 Gruppe VI Chef HNW moved to VINNITSA in the UKRAINE where it was expanded and reorganised as the Horchleitstelle (Ost). In Oct 42 the Horchleitstelle returned to LÖTZEN where it remained until the summer of 44, when it retired to ZOSSEN.

11. Organisation

Horchleitstelle (Ost) was divided into the following Referate:

Referat Z: Personnel problems

Referat 1: Various duties including supply of equipment, maintenance, evaluation of captured documents and general research into wireless procedure, frequencies, etc.

Referat 2: Evaluation, compilation of intercept situation report, Nachr Aufklärungslage Ost.

Referat 3: Russian cryptographic section. This consisted of a nucleus of cryptographers drafted to the unit at various stages, as well as of the cryptographers from the Russian Referat of In 7/VI under Inspektor DETTMANN who, PW believe, joined the unit in the autumn of 41. Additional cryptographers under the leadership of Prof NOVOPASCHENNY of OKW/Chi joined the unit in spring 42 with the special task of investigating the Russian 5-figure Code. Prof NOVOPASCHENNY returned to BERLIN in the autumn of 43, but his cryptographers were absorbed into the unit. As far as PW know, all cryptographers in Referat 3 were taken over into the unit, whatever their former dept may have been.

/4

HISTORY AND ORGANISATION OF HORCHLEIT-STELLE (OST) (contd)

11. (contd)

Referat 4: Specialised in the picking up of inter-Soviet State traffic, in the monitoring of the Russian wireless and the monitoring of REUTER and TASS News Agency broadcasts. In the winterof 1942/43 Referat 4 also acquired the Baudot Reception Station which had moved from MINSK.

12. Special Intercept Stations

The Horchleitstelle also controlled the Feste Horchstelle 11, otherwise known as FNAST 11, which picked up high grade Red Army traffic. The station was originally at VINNITSA and latterly in KIEV.

FOUNDATION OF GEN DER NACHR AUFKL

General

13. In Oct 44 the Gen d Nachr Aufkl was set up under the control of Obst BOETZEL, who was directly subordinated to Chef HNW. The object of the organisation was to ensure centralised control of intercept policy and administration, and to rationalise in the use of man power.

14. The organisation of Gen d Nachr Aufkl is shewn on Appendix 1 and described in detail in paras 16 et seq below. The changes which took place in the German Army intercept structure between Sep and Oct 44 are shewn in Appendix 2. The process of cannibalisation is described in para 15 below.

15. Details of Cannibilisation Process

(a) Forward "Y" units, Kdr d Nachr Aufkl. These were not greatly affected by the change-over. They came under closer centralised control in matters of administration and signals intelligence policy and were no longer the exclusive concern of the Local Chief Sigs Officer. To improve the intercept service in the West, Höherer Kdr d Nachr Aufkl beim OB West (Obst KOPP), was set up to control the Western front intercept units.

(b) Leitstelle d Nachr Aufkl (West) at ZOSSEN. This unit was absorbed virtually intact into Gruppe II of the Gen d Nachr Aufkl. Those sections dealing with personnel problems were absorbed into Gruppe Z, and those dealing with wireless and news agency monitoring into Gruppe I.

(c) AG N/Nachr Aufkl (OKH In 7/VI). Appears with some slight depletion of personnel to have been absorbed completely into Gruppe IV (the Cryptographic Group) of Gen d Nachr Aufkl.

(d) Horchleitstelle (Ost) was cannibalised as follows:

Referat Z to Gruppe Z
Referat 1 (Miscellaneous) to Gruppe V (Miscellaneous).
Referat 2 (Eastern Front Evaluation) to Gruppe III (Eastern Front Evaluation).
Referat 3 (Russian Cryptographic Section) to Gruppe IV (General Cryptographic Section).
Referat 4 (Intercept Service on Soviet Traffic) to Gruppe VI. Wireless and News Agency Monitoring to Gruppe I.

FOUNDATION OF GEN DER NACHR AUFKL (contd)

15. (contd)

(e) Miscellaneous. An intercept station for picking up British and American machine traffic was detached from FNLST 3 to Gruppe VI.

ORGANISATION; SCOPE OF WORK

ORGANISATION OF HQ

16. The HQ of General der Nachr Aufkl consisted of three main sections:

Stab	Comd: Obstlt ANDRAE
Unterstab	Comd: Oblt KÖBE
Gruppe Z	Comd: Maj HÜTHER

DUTIES OF HQ

Stab

17. This component controlled the signals intelligence work of the HQ units of General d Nachr Aufkl. These particular units were known as Gruppen I to VI.
The control of Obstlt ANDRAE also extended to the two special intercept stations, Feste Horchstellen 6 and 11, which were directly subordinated to Gen d Nachr Aufkl.

18. The authority of the Stab was exclusively in matters of intelligence policy and did not extend direct to intercept units in the field. It could however liaise with these through the Unterstab. The final responsibility for policy, issue of intercept reports and allocation of work within the Gruppen lay with the Stab.

Unterstab

19. This nucleus was created shortly after the foundation of General d Nachr Aufkl in order to enable the Stab to concentrate on the internal work of the directorate. The Unterstab was responsible for the intelligence control of the forward "Y" units on behalf of Obst BOETZEL, Gen d Nachr Aufkl.

20. The intelligence control of the forward "Y" units was exercised direct in the cases of KNA 1, 2, 3, 7 and 8, and via the Höherer Kdr d Nachr Aufkl beim OB West in the case of KNA 4(?)5 and 6.

Gruppe Z.

21. This section was responsible for the general administrative control of all departments within General d Nachr Aufkl. This included the Stab, the Unterstab, the various Gruppen in the directorate, the forward "Y" units and the fixed intercept stations.

22. The control of Gruppe Z can be considered under the following four headings:

(i) Personnel Matters. A central card index was kept of all personnel employed in HQ General d Nachr Aufkl or within any of its forward sub-units. Gruppe Z was responsible for all transfers, whether inter-departmental or outside the directorate.

/6

DUTIES OF HQ (contd)

22. (contd)

(ii) Registry Office (Registratur) This office registered all incoming and outgoing correspondence and was responsible for all courier comns between HQ General d Nachr Aufkl and its outlying sub-units. For local comns the Registratur had its own runners, but over long distances the courier services of the OKH were used.
In addition the Registratur duplicated some reports for the individual Gruppen.

(iii) Paymaster This section was responsible for paying all personnel of the HQ.

(iv) Drawing Section In this department situation maps and WT networks were reproduced. A certain amount of photostat and book-binding activity was also carried on.

GRUPPE I

23. General

This section, directed by Amtmann BODENMÜLLER, was responsible for two main tasks;
(a) the maintenance of comns between the units of General d Nachr Aufkl
(b) routine wireless monitoring duties.

Internal Comms

24. The signals officer of the Gruppe, Insp STRAHLENDORF, was in charge of a wireless centre and a teleprinter control centre which were centres of a network connecting the outlying units to the HQ. Teleprinter was the favoured method of comn until, in the final debacle, wireless took the most prominent place.

25. In the middle of Apr 45 a plan was evolved for setting up wireless stations in occupied parts of GERMANY for intercept purposes. Comn with these stations was to be maintained by the wireless centre of General d Nachr Aufkl. The plan was abandoned through the unfavourable development of the war.

26. Personnel employed by the comns services were almost exclusively women.

27. Monitoring Service

This section, known as Ic Rundfunkempfangstelle, was commanded by Wm PRETTEREBNER and had the following sub-sections:

(i) Rundfunküberwachung OST
Owing to personnel shortage its efforts were restricted to monitoring the MOSCOW wireless. Latterly a certain amount of BALKAN monitoring was instituted, particularly for TURKEY and RUMANIA.

(ii) Rundfunkdüberwachung WEST
Likewise because of personnel shortage this section dealt merely with the monitoring of the BBC LONDON Service.

(iii) Helldienst
This sub-section was responsible for News Agency intercepts. Owing to the manpower shortage, the intercept activity was concentrated on the REUTER Agency.

/7

GRUPPE I (contd)

27. (contd)

(iv) Evaluation

The evaluation sub-section was responsible for collating all information received from the three above-mentioned sub-sections and consolidating them into reports. Collated reports were issued, divided into separate parts for political, economic or military news. These reports were circulated within various departments of the OKH. Frequently, owing to the political nature of the information, the reports were graded G Kdos (Top Secret) although they were obtained merely from monitoring enemy wireless news. Special news flashes on items of urgent importance were also issued.

GRUPPE II

28. This section was known as Endauswertung WEST and was commanded by Hptm THIEL. Formerly Gruppe II was known as Leitstelle der Nachrichten Aufklärung (WEST) and was located at ZOSSEN. In Oct 44 it was taken over intact, less its cryptographic sections, into Gruppe II, where it continued to carry out the same functions. As all six PW worked on the Eastern leg of German intercept, they are ill-informed on the activities of this department, save that it was organised on a similar basis to Gruppe III.

GRUPPE III

Office Organisation

29. This section, known as Endauswertung OST and commanded by Hptm GORZOLLA, was responsible for the evaluation of all intercept and cryptographic work emanating from Eastern European traffic.

30. With the HQ of Gruppe III there was a special receiving office through which all messages emanating from the forward intercept units and fixed stations were passed. At the reception office the unit originating the message was identified by means of the call signs used. Undeciphered messages were thence passed immediately to Gruppe IV for deciphering and messages which were already in clear were passed to the special evaluation sub-sections according to the nature of the traffic. In addition, deciphered messages were passed back from Gruppe IV through the reception office for evaluation. The head office of Gruppe III kept a Central Card Index in which call signs, cipher indicator groups and contents of messages were registered.

31. The department was sub-divided into the following sections:

Traffic Sorting Office
Northern Sector Evaluation
Central " " "
Southern " " "
NKVD Evaluation
Partisan traffic Evaluation
Swedish traffic Evaluation.

Sources of Information

32. The main sources of information for the evaluators were call signs, cipher indicator groups and DF reports. On the basis of these it was possible to establish a detailed and accurate enemy Order of Battle and to glean adequate information of his movements and intentions.

/8

GRUPPE III (contd)

33. Surnames were an exceptionally valuable source of intelligence since they were used very frequently in Russian traffic dealing with promotions and transfers. Surnames above the rank of Major were card-indexed and were frequently a source of identification.

34. The evaluation of NKVD traffic was equally valuable, since reinforcements and movements of NKVD formations normally indicated similar developments with the Field Army. They also gave a good picture of lines of communication activity. Interception of Partisan traffic sometimes enabled the German authorities to take precautionary measures in time.

35. Reports

(a). Consolidated

O/Insp WEIMANN (assistant to GORZOLLA) was responsible for publishing the consolidated situation report, known as Nachrichten Aufklärungs Lage OST, of which 30 copies were produced. Nachrichten Aufklärungs Lage OST was compiled from a number of Funk Lage Berichte, which the special sections within Gruppe III produced. These sections each provided a part of the final report.

(b) Sector Reports

Each sector report was divided into two main parts. The first part consisted of a WT network which sketched the Order of Battle from Div upwards and indicated call signs and cipher indicator groups in use, as well as the location of wireless stations. The DF-ing of stations within the areas of the forward "Y" units was done by the forward "Y" units themselves. Information on other stations was passed back to Gen der Nachr Aufkl, who were responsible for the necessary evaluation. The second part of each sector report consisted of the decoded text of intercepted traffic, above the level of Div, which had been either decoded at Gen der Nachr Aufkl or already dealt with by the forward "Y" units.

GRUPPE IV

General

36. This department, commanded by Maj HENZE, was responsible for all cryptographic work at General der Nachrichten Aufklärung. It catered for work on the Eastern and Western fronts.

37. Gruppe IV was built up from the following three sources: The defunct Ag N/Nachr Aufklärung (formerly In 7/VI) and the Cryptographic Sections of Leitstelle der Nachrichten Aufklärung (West) ZOSSEN and the Horchelitstelle (Ost) formerly at LÖTZEN.

38. Gruppe IV was divided into separate Referate according to the origin of the material. Material dealt with in Gruppe IV consisted of traffic which the forward intercept units had picked up and had been unable to decipher. A certain amount of special traffic was also picked up by the fixed intercept stations attached to the General der Nachrichten Aufklärung. (See paras 5[illegible] to 57).

GRUPPE IV (contd.)

39. Referat 1

Referat Ia

Analytical research, work on British and American machine cipher and on Russian five-figure traffic. No further details are known to PW.

Referat Ib

Mathematical section, research on American, English and French machine ciphers and on Russian Baudot traffic. No further details are known to PW.

40. Referat 2

This section dealt with the deciphering of Western European traffic and also probably Hungarian, Roumanian and Italian ciphers. Further details are unknown to PW.

41. Referat 3

Eastern front deciphering.

Referat 3a

Dealt exclusively with NKVD traffic. A small nucleus was devoted to research on reconstructing the ciphers and a larger section engaged on deciphering work.

Referat 3b

Sub-section specialising in Red Army traffic.

Referat 3c

Responsible for deciphering of Partisan traffic.

Referat 3 (Analytical section)

Carried out research on Russian codes and ciphers in general.

42. Referat 4

PW have little knowledge of this department. It carried out statistical work and was believed to be principally devoted to Hollerith activity.

43. Referat 5

This sub-section held the cryptographic course for cryptographers specialising either on Western European or Russian traffic. The course lasted 10 to 12 weeks and was controlled by O/Insp KÜHN, who had formerly directed the cryptographic course run by Insp VII/6 at JÜTERBOG.

GRUPPE V

44. This department, commanded by Amtmann BLOCK, had a fairly wide field of activity and was divided into three Referate with quite distinct functions.

/10

GRUPPE V (contd)

45. Referat 1 - Funk Betriebsforschung

O/Insp ZIPPER led this section, with Wachtm SCHLETZ specialising on Western Eurpoean traffic, and Wachtm STETTER on Eastern European traffic. The section as a whole was engaged in reconstructing Russian, British and American call signs and systems, and in thence deducing the units referred to. Other subjects covered included the general wireless procedures, frequencies, codes and abbreviations used by enemy wireless; allocation of wavelengths was also studied by this section. PW have not a thorough knowledge of this section, but state that considerable success was achieved in reconstructing enemy wireless networks from research along the lines indicated.

46. Referat 2 - Beuteauswertung OST

This department was controlled by Amtmann BLOCK, the head of Gruppe V, in person. It was responsible for the exploitation of captured Russian documents of sigs interest; captured manuals were translated and similarly descriptions of Russian equipment and standing instructions for Russian signals procedure were examined. At the end of Apr 45 Referat 2 had completed an up-to-date booklet on Russian abbreviations, which was ready for publication. This book was to have been made available to all forward intercept units.

47. Referat 3

This section had two tasks, that of supplying the forward intercept units with the necessary equipment and that of maintaining a workshop to service the needs of HQ General der Nachrichten Aufklärung.

GRUPPE VI

48. General

This dept, directed by Hptm RÖDER, was responsible for intercepting and evaluating special high-grade machine cipher.

49. Ref 1 A

This section dealt with the evaluation of Russian Inter-Soviet traffic picked up on Baudot networks. On the basis of this the Wehrwirtschaftsnachr (WWN) were compiled. These bulletins gave a detailed summary of the Russian economic situation, particularly in the areas of MOSCOW, BAKU, ROSTOV, and included production figures and details of supply and labour situations. About 30 copies of this report were issued. Detailed card indexes of a economic nature were kept; they included names and locations of factories and personalities therein.

50. Ref 1 B

Consisted of two cryptographers who undertook research into the cipher machine employed for Baudot traffic forward of GHQ MOSCOW. They also assisted Referat I C in preliminary evaluation.

51. Ref I C

This section picked up Inter-Soviet and Red Army Baudot traffic and dealt with the preliminary evaluation of Red Army Baudot traffic. This traffic was in figure cipher. On the

FINAL ETICAL LIST OF PERSONALITIES

ABEL. Oberst

Gruppe IV, Referat 3c. Specialised in Russian problems and is known only by name.

ACKERMANN. Uffz

Gruppe III, Evaluation Eastern Dept. Comes from Berlin. Assistant in compiling situation reports. Thoroughly [illegible]. Last seen in BOSSEN Jan 45, when he was posted.

Description: Height 1.70 m; weight 135 lbs; age 25 - 27; round face; dark hair; clean-shaven; single.

ANDRAE. Obstlt

Chief of Staff, General der Nachrichten Aufklärung. Regular soldier. Resident in BERLIN, with relatives in STUTTGART. Very practical, quiet type. Formerly Kommandeur der Nachrichten Aufklärung V. Of the higher ranking officers the best informed on signals intelligence matters.

Description: Height 1.82 m; weight 155 lbs; age 40; round face; fair complexion; clean-shaven; wears glasses; Swabian dialect; married; 2 children.

ANDREJEWSKI. Mr

Gruppe IV, Ref 3a. Wife lives in BAVARIA near BAD REICHENHALL. Last seen 2 May 45 at BAD REICHENHALL. Speaks Russian; [illegible] cryptographer; specialist in NKVD ciphers.

Description: Height 1.70 m; weight 135 lbs; age early 40s. Round face; clean-shaven; wears glasses; married.

APEL, Uffz

Gruppe IV, Referat 1a. Lives in PRAGUE. Quiet and conscientious; [illegible] analyst and successful cryptographer. Last seen in GLASHÜTTEN, near SALZBURG, Apr 45.

Description: 1.70 m; weight 110 lbs; age 35 to 40; long face; dark hair; clean-shaven; married.

[illegible]. Uffz

Chief radio Group [illegible]. Soldier in civilian life. Resident in BERLIN. Pleasant disposition. Evaded from Metz. Last seen in [illegible] 2 May 45.

Description: Height 1.60 m; weight 120 lbs; age 45; round face; ruddy hair; clean-shaven; wears glasses; dark clothes; married; 2 adult daughters.

A P P E N D I X 4

(Sheet 2)

DIER. Uffz

Gruppe IV, Ref. 3 (Analytical Section). Resident in MÜNICH near MÜNSDORF. Quiet type. Grew up in the VOLGA area of RUSSIA. Settled in GERMANY after the Great War; specialised as an analyst on Russian ciphers; average ability. Last seen Apr 45 at GLASENBACH, near SALZBURG.

Description: Height 1.72 m; weight 135 lbs; age 35 yrs; brown hair; clean-shaven; married.

DIECKELMANN. O/Gefr

Worked in Gruppe I Rundfunküberwachung Ost. Responsible for monitoring Russian wireless. Property owner. Quiet, pleasant type. Lived in RUSSIA from 1912 to 1937. Trained in the Dolmetscher Kp BERLIN. Very good knowledge of Russian. Last seen 30 Apr 45 at BAD REICHENHALL.

Description: Height 1.70 m; weight 150 lbs; age 58; square face; reddish complexion; white, parted hair; clean-shaven; glasses; deep voice; married; Russian wife.

DIRKER. Uffz

Gruppe III Eastern front evaluation. Bookkeeper. Silesian. Pleasant disposition. Speaks Polish. Specialised in identifying NKVD traffic. Conscientious and thorough worker. Last seen Summer 44 in ZOSSEN.

Description: Height 1.72 m; weight 135 lbs; age 25 to 30; round face; fair hair; clean-shaven; married.

DITTERL. Oblt
